

SECONDARY CONTAINMENT RENTAL PROGRAM TERMINAL 91 UPLANDS & PIERS 90/91

If you store containers outside, City of Seattle stormwater regulations requires covered secondary containment. Secondary containment is required for used automotive fluids, liquid feedstock, cleaning compounds, chemicals, dangerous wastes (liquid or solid), and contaminated stormwater (City of Seattle Stormwater Manual, July 2021, Volume 4: Source Control, Best Management Practice 28).

The Port is helping tenants and customers to meet this requirement by offering secondary containment equipment for rent. For more information, please contact the Port's Marine Stormwater Utility at: Stormwater-Maritime@portseattle.org

EQUIPMENT AVAILABLE FOR RENT

4-drum Spill Containment Pallet

- For use indoors or under cover
- Suitable for 55-gallon drums, buckets, and forklift loading
- Dimensions: 49 x 49 x 11"
- Dry weight: 77 lbs
- Rental cost: \$2.00 per day, \$36.00 per month

4-drum Spill Containment Storage Shed

- Can be used outdoors
- Suitable for 55-gallon drums and buckets
- Dimensions: 57 x 54 x 64.5"
- Dry weight: 226 lbs
- Rental cost: \$11.00 per day, \$186.00 per month

2-tank Intermediate Bulk Container (IBC) Spill Containment Pallet

- For use indoors or under cover
- Suitable for caged Intermediate Bulk Container tote
- Dimensions: 80 x 73 x 30"
- Dry weight: 293 lbs
- Rental cost: \$9.00 per day, \$152.50 per month

BEST MANAGEMENT PRACTICES: PORTABLE CONTAINERS

Store and manage portable containers properly to prevent pollutants from entering stormwater systems by following these **Best Management Practices (BMPs)**:

- Keep containers in a structure or under cover, and do not block stormwater catch basins or other drain inlets
- Always store liquids within secondary containment
- Use a leak-proof container with tight fitting lid
- Label all containers with contents and hazards, or as empty
- Immediately address leaking containers with a secondary container or transfer contents to another container
- If safe to do so, immediately clean up leaks/spills with absorbent materials - pick up absorbents after use!
- Train employees on proper housekeeping and storage practices
- Document BMPs and keep training records onsite

BAD PRACTICES

- Not covered
- Materials stacked haphazardly
- Containers not stored upright

GOOD PRACTICES

- Covered storage
- Elevated off ground
- Secondary containment

If you see evidence of or actions causing a spill on land, contact Port's 24-hr Terminal 91 Operations Line: **(206) 787-3751**
